etc.

Stockpiles for seven days

They are necessary items that evacuees can lead lives at shelters or their houses for about one week. Please keep them at a place that you can take out them from, even if your house suffers from a disaster.

★ These items above are examples. Please keep stockpiles according to the actual situation of your family.

Effortlessly Prepare for foods and daily necessities by stock rotation

- ① Slightly more stocks
- ② Consume
- ③ Buy additional

This cycle allows us to keep stockpiles of foods and daily necessities with short expiration dates.

Absolutely stockpile portable toilet !

After disasters, toilets become unusable with high rate. Please stockpile a handy toilet or portable toilet in preparation for disasters.

▲ Handy toilet:
Bag type one that stabilizes moisture by a water absorbing sheet or coagulant.

▲ Portable toilet:
Portable small one with a sitting seat. Coagulant is required as accompanying item and must be stockpiled.

Toilet problems at a disaster are serious!!

Immediately after a disaster, household toilets become unusable with high probability. Temporary toilets will be installed in an evacuation center, however, they would be crowded and make users wait for a long time depending on the situation.

When anxiety and stress to endure not going to a toilet come together, you may become sick. Please store "portable toilet" or "handy toilet" to prepare for a disaster and maintain you and your family healthy.

Please add portable and handy toilets to emergency supplies

Portable and handy toilets

● **Portable toilet**
Small toilet with a sitting seat. Handy toilet is also required as emergency supplies.

Feel safe with this during a disaster!

● **Handy toilet**
Use it by attaching to Western-style toilet or dry toilet. It is an easy-to-use bag-type toilet and is disposable as garbage.

How to use a handy toilet.

① Cover toilet bowl with plastic bag and then put portable stool bag on it.

After use toilet, only replace h stool bag. Clamp it between the plastic bag and seat.

② **《Water absorbing sheet type》**
After putting water absorbing sheet in the stool bag and relieve yourself.

《Coagulant type》

Before or after relieving yourself, scatter coagulant.

Dispose the stool bag with putting used toilet paper inside.

③ Deflate the bag and tie its opening tightly closed.

④ Store bags separately from general garbage and dispose stool bags all together.
